SCIENTIFIC AND TECHNICAL INTELLIGENCE COMMITTEE

I. I instruct the Scientific and Technical Intelligence Committee (STIC) to continue to direct its thrust so as to support the USIB, the NIOs, and other tasking elements in the KIQ process. The STIC should take the lead to providing a dynamic overview and coordinate all intelligence community activities related to significant foreign science and technology which might lead to future political, military, or economic threats to the US.

In the management guidance area, I specifically instruct you to:

- a. Complete the reorganization of the STIC and the transfer of subgroups to GMAIC during August 1975.
- b. Recommend KIQs to the NIOs on a continuing basis: 1976 KIQs during July 1975; 1977 KIQs in April 1976.
- c. Develop certain appropriate FY-76 Strategy Reports in early FY-76; FY-77 KIQ Strategy Reports in May 1976.
- d. Participate in the 75 KEP in July-August 1975; the 76 KEP in May-June 1976.
- e. Update and refine the S&T Priority Display as needed, but at least once by the end of the 4th quarter of FY-76.
- f. Update and refine the S&T Collection and Production Displays by the end of the 4th quarter of FY-76.

SECRET

h. Provide support to certain government groups concerned with S&T problems within the Charter of STIC.

i. Continue FY-75 efforts for modelling S&T resource allocations.

j. Continue the efforts described in paragraphs II and III of the 1975 LOI to Chairman, STIC, with regard to early warning of S&T advances, participation of other governmental elements, and close working arrangements with USIB committees.

With regard to substantive problems, I request that you prepare reports on the following subjects and others during the year as the need arises:

- a. Long-range Look at S&T Developments that Would Be of Consequence to the US Government if Developed by Foreign Countries - 2nd quarter FY 1976
